WORK EXPERIENCE

React Native Frontend Developer with Typescript

KUSANA CO.LTD.   Feb 2022 - Apr 2022 (2 months)

・Working collaboratively with other members of the team who are highly interested in technology, I learned a more concise coding style.
・Using TypeScript and ReactNative, I contributed to the development of a camp equipment sharing and management application.
・User settings page and transaction history list page have been added.
・We worked on an Issue basis on GitHub.

React Full Stack Developer

GOOPTER ECOMMERCE SOLUTIONS   Oct 2021 - Feb 2022 (5 months)

・The React code could be read, implemented, and improved.
・Refactor from one big component to leaner smaller and focused components.
・The designer decided on the specifications and the flow of implementation, so I voluntarily made suggestions for implementation for any missing specifications.
・For the parts I had no experience with, such as Wordpress, I used my knowledge and experience with Java back-end APIs to handle the work. I studied on my own after work to catch up on areas where I felt I did not have enough knowledge.
・I had no experience with WordPress, and I took charge of the project without any handover, but I was able to make predictions based on my past experience and responded within the deadline.
・Since I was working for a start-up company, there were many situations where I had to solve problems by myself, such as no one knowing the requirements but myself, which gave me the opportunity to further improve my ability to run on my own.

Java Full Stack Developer

SG SYSTEMS CO., LTD.   Oct 2020 – Jun 2021 (9 months)

・The business was handled without any problems.

Java Full Stack Developer

NEC CORPORATION   Feb 2020 - Sep 2020 (8 months)

・At the time of joining the project, there was a one-year delay in the schedule, so we worked 6 to 7 days a week to recover from the delay.
・As the number of workers was about 10, I actively documented the items I investigated so that the other members could understand them smoothly.
・I also provided support to the less experienced members and the members who participated in the project urgently and lacked experience so that they could proceed with the work, and I made conscious efforts to improve their progress and meet the deadline.

UI Developer

TOAMI CORP.   Jan 2020– Jan 2020 (1 month)

・Although I had no experience with animation using CSS and jQuery in my work, I was able to investigate the implementation method for the parts I did not understand and proceeded with my work without any problems.
・In my previous experience, I had mainly done back-end modifications and most of the front-end modifications were minor, so this was the first time I had created a screen from scratch. I realized the importance of HTML tag structure and CSS design to ensure maintainability and scalability when creating new screens.

Java Full Stack Developer

ITEC HANKYU HANSHIN CO., LTD.   Aug 2018 - Dec 2019 (1 year 5 months)

・Since we have been working with them for over a year, we have been able to work with them on a relatively large scale of modifications, such as the introduction of a reduced tax rate and modifications to the purchase flow.
・To avoid bugs, we focused on understanding the specifications and put a lot of effort into research and documentation.
・We identified the current specifications in matrix form and proceeded with revisions while

making detailed comparisons between the current and new specifications.

Java Backend Developer

SUZUYO CO. LTD.   Mar 2018 – Jul 2018 (5 months)

・The business was handled without any problems.

Java Backend Developer

BUSINESS BRAIN SHOWA-OTA INC.   Mar 2017 – Feb 2018 (1 year)

・The main task was to investigate data using SQL to investigate defects.
・I gained experience reading and creating complex queries.

EDUCATION

Web and Mobile App Development Co-op Diploma

CORNERSTONE INTERNATIONAL COMMUNITY COLLEGE OF CANADA   Sep 2021 - Sep 2023

Bachelor of Literature

DOSHISHA UNIVERSITY   April 2012 - March 2016
